

## APC-90

The APC-90, our most popular model recognized as the number one choice by our clientele and also by a magazine similar to *Protégez-vous* in Sweden!

The APC-90 is a breathalyzer that has a “premium” sensor of the highest quality, similar to those sold to police force. It has a test counter and it keeps the last 5 in memory. Moreover, it has a low battery indicator, automatic audible alarm when the reading is above 0.05%. **An excellent value.**
