

TECHNICAL DATA SHEET

ALCOGRAD

Single-use Breathalyzer

The Alcograd lets you know if you exceed the legal limit allowed for driving a vehicle!

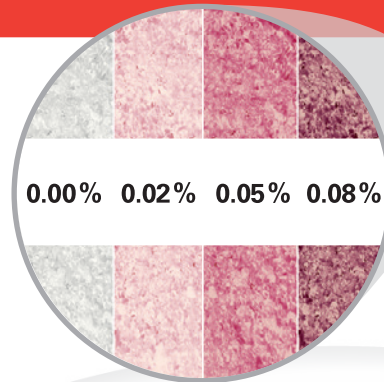

AN INNOVATION!

A different colour for each alcohol level!

It indicates you clearly if you are at 0.00, 0.02, 0.05 or 0.08%!

The Alcograd is TÜV certified and is approved by MADD Canada.

This inexpensive breathalyzer can be used to both individuals and companies wishing to ensure that their employees and guests return home safely. It can be used on various occasions and corporate events such as office parties, golf tournaments, 5-7, cocktails, etc.

BENEFITS

- » Effective
- » Easy to interpret: a different colour for each alcohol level
- » Economical
- » Provides a peace of mind
- » No calibration needed
- » Can save lives and prevent accidents
- » Small and discreet, it fits easily in a shirt pocket or handbag.

OPERATION

Easy to use: after pressing both ends to pierce aluminum, simply blow into the tube and wait for 4 minutes to interpret the result.

FEATURES

- » Dimensions: 10 cm long x 1 cm in diameter (diameter of a pencil)
- » Weight: 6.0 grams
- » Accuracy: only $\pm 2\%$ margin of error
- » The result appears in 4 minutes
- » Required time after last alcohol intake: wait 20 minutes after the last drink
- » Required time after smoking: wait 5 minutes after the last cigarette
- » Shelf life: printed on the packaging (about 18 months)
