

SOS FATIGUE

Headset with anti-sleep alarm

DON'T FALL ASLEEP AT THE WHEEL

Fatigue is a leading cause of collisions on our roadways. Fatigue weakens our faculties often without us realizing it. The accumulation of tiredness impacts our ability to drive by decreasing concentration, affecting judgement and delaying our response time.

For that reason, **SOS FATIGUE** is an indispensable device since tipping your head forward is a normal reflex when you fall asleep. **SOS FATIGUE** will alert you with an anti-sleep alarm if you begin to show signs of falling asleep while driving.

BENEFITS

- Stay alert
- Remain awake
- Stay concentrated

USEFUL FOR ALL DRIVERS

car • bus • taxi • truck • industrial machinery operators and more!

Stay alert at all times and wear the SOS Fatigue
