

STOP Drug FDG®

DRINK SPIKING COVER

Don't let an intruder drug your drink

DID YOU KNOW THAT...

- GHB causes drunkenness, loss of inhibition and memory loss.
- KETAMINE causes a feeling of drunkenness, drowsiness, and confusion.
- The victims of these drugs are women and men.
- Intoxicated, they may have been sexually assaulted or have committed theft without their knowledge.

THE SOLUTION: STOP Drug FDG®, our drink spiking cover

- Fits most glasses
- Customizable with your logo!
- 100% recyclable
- Compatible with food industry standards
- Also ideal for airlines, cinemas and homes for the elderly to avoid spillage of drinks.

Protecting yourself is first and foremost protecting your glass.

STOP

Drug FDG®
DRINK SPIKING COVER

Drink safely!

Follow these super simple instructions

- Firstly, make sure your glass is completely dry.
- Pull the tab off the STOP Drug FDG® cover to separate the protection, releasing the adhesive portion.
- Place the lid in the center of the glass and slide your hands all the way around the glass and apply light pressure to coat the edge of the glass.
- Insert a straw into the pre-cut cross where the X is.
- Drink safely!
- Once your drink is finished, peel off the lid of your glass.
